

FROM THE COALITION FOR HEMOPHILIA B

A unique experiential program designed specifically for people living with hemophilia B. The Generation IX Project supports the hemophilia B community with a series of mentorship, advocacy, and leadership programs that challenge, educate, motivate, and empower participants to make positive changes in their lives and in their communities.

THE GENERATION IX PROJECT

The Generation IX Project was launched in 2014 as a program uniquely designed to educate, empower and engage individuals with hemophilia B. Since then, more than 200 individuals with hemophilia B have participated in a Generation IX Project. Each program offers a different experience with different outcomes — The programs are designed to help you push your own personal boundaries in a safe, inclusive and impactful way.

THE VIRTUAL LEADERSHIP EXPERIENCE

Young adults gather virtually for leadership training designed specifically for the Hemophilia B Community. Discover and develop new parts of yourself as a community leader that you can apply to personal, educational, professional and volunteer opportunities. Learn about leadership theory through experiential challenges with a team of motivated collaborators. Take part in virtual “hands-on” training components that make learning stick. Register early to receive a custom box of program materials to enhance your experience. This is *not* a typical webinar!

Ages: 18 to 35

Program Dates: Virtual Meetings on Mondays and Thursdays, March 1st to March 18th, 2021

THE GENERATION IX PROJECT – LEADERSHIP, PROGRAM DESIGN, AND SPONSORSHIP

The Coalition for Hemophilia B: Wayne Cook, Kim Phelan and Dr. David Clark each bring over 28 years of experience in hemophilia B. We have been empowering people with hemophilia B and their families to ensure they have the best quality of life possible. We offer a family-oriented hands on approach. We provide timely information, so members and their families are well informed. We believe education is power and provide several outreach programs such as our factor nine newsletter, factor nine family meetings, retreats and yearly symposium. The Coalition brings together some of the most dedicated professionals in the hemophilia community and we continually challenge ourselves to grow to meet the needs of the community. www.HemoB.org

GutMonkey is designing and implementing this program through a partnership with the Coalition for Hemophilia B thanks to the generous support of Medexus Pharma. GutMonkey has been delivering innovative experiential education programs and trainings for over 15 years. Pat Torrey started GutMonkey as a way to offer unconventional, adaptable, relationship-centered adventure education programs that teach those with chronic medical conditions how to lead the lives they want. Their team challenges and inspires people to explore outside of their perceived limits and strive for excellence. They run trainings and consult within the bleeding disorder community for camps, foundations, and boards. www.gutmonkey.com

Medexus Pharma is the manufacturer of a recombinant Factor IX product and is entirely dedicated to the hemophilia B community. Medexus is proud to be the sole sponsor of the Coalition for Hemophilia B's Generation IX Project. More information about Medexus' programs for the hemophilia B community can be found at www.MedexusCommunitySupport.com.

FAQS

- **Cost Per Person:**

Thanks to the generosity of Medexus Pharma, participation and attendance at any of the Generation IX Project is provided at no cost to participants.

- **Participants:**

Anyone with a diagnosis of hemophilia B within the age range for each program is welcome to apply. Past participants of other Generation IX programs and new folks are encouraged to apply!

- **Technology:**

A computer, laptop, tablet or phone with audio, video and internet access is required. Contact the organizers if technology access may limit your participation.

- **Who do I contact if I have any questions?**

- The Coalition for Hemophilia B (contact@hemoB.org)
- GutMonkey (genIX@gutmonkey.com)
- Medexus Pharma (factorIX@medexus.com)
